

Word Drawing, 21x29.7cm, Inkjet print on Fabriano Accademia Paper 200g, 2020

The "Word Drawings" series is a component of the artist's decade-long exploration, during which he has harnessed Microsoft Office Word software for drawing and painting. Despite the inherent limitations of this tool, the artist adeptly employs it to convey his research. The process involves a combination of overprinting techniques and hands-on manipulation of a home printer. This has given rise to several distinct series, including "Word Drawings," "Word Paintings," "Word Files," and an artist publication titled "Word Documents."
